WORKING TOWARDS A **GREENER** FUTURE

As a company we know we have a responsibility to the environment and we are continually working to reduce our impact. We believe in a greener future.

Our pledge to the environment goes back a long way, we were the first and are still one of the only companies that fully recycle Correx boards.

In 2006 we supplied 560 tonnes of Correx sheets into the Estate Agency market and recycled 80 tonnes of used material, with waste

being reprocessed into milk crates, bread crates, plant pots and many other packaging items.

We also produced 900 tonnes of timber for estate agent posts, all of which is sourced from Scandinavian countries who undertake to plant more trees that are cut on an annual basis.

All of our inks are totally lead free and all manufacturing plants are fully protected with water treatment equipment to fully protect the environment at every stage.
